PROPORTION TOTAL IMPORTS FOR 2008

Annual Imports Report 2008

1. The total imports for the year 2008 of material goods and petroleum products combined (6680.2 (billion Iraqi dinars equivalent to (5.6) billion dollars.

2. The total imports for the year 2008 for oil products was (4091.0) billion Iraqi dinars, equivalent to (3.4) billion U.S. dollars at the exchange price 1203 Iraqi dinars to the dollar as the Central Bank of Iraq market price.

3. The total imports for the year 2008 for materials goods was (2589.2) billion Iraqi dinars, equivalent to (2.2) billion U.S. dollars at the exchange price 1203 Iraqi dinars to the dollar as the Central Bank of Iraq market price.

4. Total net value of the total trade balance for the year 2008 (66837.1) billion Iraqi dinars, equivalent to (55.7) billion dollars.

5. Total net value of the total trade balance (excluding crude oil and petroleum products) for the year 2008 (5.2359-) billion Iraqi dinars, equivalent to (2.0-) billion U.S dollars.

6. The highest value of imports for the year 2008 was from Korea which was (.8706) billion Iraqi dinars, or equivalent to (0.6) billion dollars and it is (27.3%) of the total commodity imports except crude oil and petroleum products due to the importation of vehicles, which accounted for (55%) of the total imports from Korea, as a percentage of (6%) from the total imports, followed by China (504.6) billion Iraqi dinars, or equivalent to (0.4) billion dollars and it is (19.5%) of the total commodity imports except crude oil and petroleum products due to the importation of vehicles, which accounted for (45%) of the total imports from China, as a percentage of (3%) from the total imports, followed by Japan (319.6) billion Iraqi dinars, or equivalent to (0.27) billion dollars and it is (12.3%) of the total commodity imports except crude oil and petroleum products.

7. The value of imports for the year 2008 from the Arab States was(589.8) billion Iraqi dinars, or equivalent to (0.5) billion dollars and it is (23%) of the total commodity imports except crude oil and petroleum products Where Saudi Arabia has the highest value of imports from the Arab countries was (161.1) billion Iraqi dinars, or equivalent to (0.13) billion dollars and it is (6.2%) of the total commodity imports except crude oil and petroleum products, as a percentage of (26.9%) from the total imports of Arab States.

Followed by the Hashemite Kingdom of Jordan (151.4) billion Iraqi dinars, or equivalent to (0.13) billion dollars and it is (5.8%) of the total commodity imports except crude oil and petroleum products, as a percentage of (25.3%) from the total imports of Arab States.

Followed by the Syrian Arab Republic (85.2) billion Iraqi dinars, or equivalent to (0.07) billion dollars and it is (3.3%) of the total commodity imports except crude oil and petroleum products, as a percentage of (14%) from the total imports of Arab States.

Concepts and definitions

Trade balance is calculated by the exports value of (FOB) minus the value imports value of (CIF).

The product origin country – is the country that the commodity is manufactured, extracted or planted. Regardless of the region that was shipped from.

Points of entry - the customs border areas recognized the entry or exit of goods across international borders of Iraq.

Weight - means the net weight of the goods gross weight of any commodity minus the weight of packing materials and it is expressed in kg.

Quantity - the amount of goods imported or exported which is countable like the number of televisions , cars or square meters for fabrics, and the size of the cubic meter of wood, etc. ..

Commodity Classification – goods classified by the international standard classification (REV1) for foreign trade.

(RI-SITC) standard international trade classification prepared by the statistical service of the United Nations, and it was worked in the country since 1970.

Introduction: --

Comprehensive economic planning has become a necessary for all developing countries seeking to exploit their economic and human resources to achieve high rates of economic development .Therefore foreign trade sector has an important role in determining the dimensions and the path of comprehensive economic development plan, where exports contribute directly to increasing the national income, while imports they indirectly contribute in increasing growth rates of national income through the employment of investment goods and inputs necessary for the development process.

So the Central organization of Statistics and Information Technology has the pleasure to submit the annual private sector imports report for the year 2008, which was under reconstruction forms fee (5%) we hope be useful for those involved.

Methodology of work: --

1 - the reliance on electronic data sent from the Ministry of Finance / general commission Customs for the border points.

2 -The value of Iraqi dinars at current exchange in the General Administration of Customs and the equivalent to the dollar.

3 - The imported goods value represented under the reconstruction form Fee (5%).

4 – The value of imported goods represented be the private sector fee (5%) only and does not include the public sector or the tax exempted goods because the import value is not known .

5 - The data classified and collected by material type and the country of origin, and the classification symbol was put by the trade statistics department.

6 - Iraq follow (the private system) in the collection and classification of foreign trade data, which means the registration of the commodity (statistically) through the entry or and exit of the customs border (points) not the regional boundaries.

7-Imports evaluation - based on (CIF) value of any goods plus "the cost of transport and insurance".

8-Exports evaluation of - based on (FOB) free on board, including all transportation costs and fees paid in the country of origin.
